VOLUME CONTENTS

Number 1

R. Segev and G. Rodnay	1	Worldlines and body points associated with an extensive property
J. Kumar, C. Lakshmana Rao and M. Massoudi	11	Couette flow of granular materials
B.S. Dandapat and A. Mukhopadhyay	21	Waves on the surface of a falling power-law fluid film
T.G. Myers	39	Variable viscosity squeeze films and bubble removal in the manufacture of panel material
S.K. Tso, T.W. Yang, W.L. Xu and Z.Q. Sun	51	Vibration control for a flexible-link robot arm with deflection feedback
H. Demíray	63	On the derivation of some non-linear evolution equations and their progressive wave solutions
M. Oshhkunov and S. Ozden	71	The conditions of minimum potential energy and Castigliano's functional in a non-linear media
M. Carini	79	On the axi-symmetric equations of a rigid heat conductor: discontinuity waves in a non-constant state
S.K. Naboulsi and A.N. Palazotto	87	Non-linear static–dynamic finite element formulation for composite shells
J. Gerstmayr and H. Irschik	111	Vibrations of the elasto-plastic pendulum
A. Maccari	123	Vibration control for the primary resonance of the van der Pol oscillator by a time delay state feedback

Number 2

A. El gohary and S.S. Askar	133	Control of the rotational motion of the rigid body with the help of internal rotors using Rodrigues–Caley parameters
H. Storck and J. Wallaschek	143	The effect of tangential elasticity of the contact layer between stator and rotor in travelling wave ultrasonic motors
W. Schiehlen and B. Hu	161	Spectral simulation and shock absorber identification
L. Librescu, G. Chiocchia and P. Marzocca	173	Implications of cubic physical/aerodynamic non-linearities on the character of the flutter instability boundary
V. Birman and L.W. Byrd	201	Effect of matrix cracking in cross-ply ceramic matrix composite beams on their mechanical properties and natural frequencies

M. Yuichiro and M. Haruki 213 Piecewise linear model for water column oscillator simulating reactor safety system

C.A. Featherston 225 Imperfection sensitivity of curved panels under combined compression and shear

Z.L. Huang and W.Q. Zhu 239 A new approach to almost-sure asymptotic stability of stochastic systems of higher dimension

B. Wu and H. Zhong 249 Application of vector-valued rational approximations to a class of non-linear oscillations

F. Biguenet 255 Fluid with internal wettability

E. Olso and S. Kyriakides 267 Internal ring buckle arrestors for pipe-in-pipe systems

Erratum

R.M. Ghigliazza and P. Holmes 285 Erratum to "On the dynamics of cranes, or spherical pendula with moving supports" [Int. J. Non-Linear Mech. 37 (2002) 1211]

Number 3

V. Busuioc and D. Cioranescu 287 On the flow of a Bingham fluid passing through an electric field

K. Vajravelu and J. Rivera 305 Hydromagnetic flow at an oscillating plate

M. Massoudi 313 Constitutive relations for the interaction force in multi-component particulate flows

V.Y. Perel and A.N. Palazotto 337 Dynamic geometrically nonlinear analysis of transversely compressible sandwich plates

J.C. Hayen 357 Projectile motion in a resistant medium Part I: exact solution and properties

J.C. Hayen 371 Projectile motion in a resistant medium Part II: approximate solution and estimates

B. Wu and Y. Piao 381 A note on the critical points of equilibrium paths in imperfect structures

J. Juel Thomsen and A. Fidlin 389 Analytical approximations for stick–slip vibration amplitudes

L. Cavaleri, M.D. Paola and G. Failla 405 Some properties of multi-degree-of-freedom potential systems and application to statistical equivalent non-linearization

C. Fetecau and C. Fetecau 423 A new exact solution for the flow of a Maxwell fluid past an infinite plate

Number 4

H.I. Abdel-Gawad	429	A method for finding the invariants and exact solutions of coupled non-linear differential equations with applications to dynamical systems
J.R. Walton and J.P. Wilber	441	Sufficient conditions for strong ellipticity for a class of anisotropic materials
J. Zhang and D.H. van Campen	457	Stability and bifurcation of doubly curved shallow panels under quasi-static uniform load
J. Yang and H.-S. Shen	467	Non-linear analysis of functionally graded plates under transverse and in-plane loads
M.A. Vaz and D.F.C. Silva	483	Post-buckling analysis of slender elastic rods subjected to terminal forces
M. Battaglio, N. Bellomo, I. Bonzani and R. Lancellotta	493	Non-linear consolidation models of clay which change type
T. Hayat, T. Haroon, S. Asghar and A.M. Siddiqui	501	MHD flow of a third-grade fluid due to eccentric rotations of a porous disk and a fluid at infinity
A.A. Megahed, S.R. Komy and A.A. Afify	513	Similarity analysis in magnetohydrodynamics: Hall effects on free convection flow and mass transfer past a semi-infinite vertical flat plate
C.Q. Ru	521	Non-elliptic deformation field near the tip of a mixed-mode crack in a compressible hyperelastic material
R. Tchoukuegno, B.R. Nana Nbendjo and P. Woafo	531	Linear feedback and parametric controls of vibrations and chaotic escape in a Φ^6 potential
C. Proppe	543	Stochastic linearization of dynamical systems under parametric Poisson white noise excitation
C. Proppe	557	Exact stationary probability density functions for non-linear systems under Poisson white noise excitation
U. von Wagner	565	Non-linear longitudinal vibrations of piezoceramics excited by weak electric fields
A. Maccari	575	Periodic and quasiperiodic motion for complex non-linear systems
S.K. Dwivedy and R.C. Kar	585	Simultaneous combination and 1:3:5 internal resonances in a parametrically excited beam–mass system
R.F. Yükseler	597	The parameters affecting the differences between the solutions corresponding to two different definitions of the reference surface of deformed rubber-like shells of revolution
C. Fetecau and C. Fetecau	603	The Rayleigh–Stokes-Problem for a fluid of Maxwellian type

R. Haiwu, X. Wei, W. Xiangdong, M. Guang and F. Tong	609	Maximal Lyapunov exponent and almost-sure sample stability for second-order linear stochastic system

Number 5

W. Anwen and T. Wenying	615	Characteristic-value analysis for plastic dynamic buckling of columns under elastoplastic compression waves
E. Bucchignani, A. Georgescu and D. Mansutti	629	A Lorenz-like model for the horizontal convection flow
T. Wenchang, P. Wenxiao and X. Mingyu	645	A note on unsteady flows of a viscoelastic fluid with the fractional Maxwell model between two parallel plates
K.V. Prasad, S. Abel and P.S. Datti	651	Diffusion of chemically reactive species of a non-Newtonian fluid immersed in a porous medium over a stretching sheet
S. Baek and A.R. Srinivasa	659	A variational procedure utilizing the assumption of maximum dissipation rate for gradient-dependent elastic–plastic materials
I.J. Rao	663	Effect of the rate of deformation on the crystallization behavior of polymers
A.X.C.N. Valente, N.H. McClamroch and I. Mezić	677	Hybrid dynamics of two coupled oscillators that can impact a fixed stop
E. Brommundt	691	Reibung, Selbsthemmung, Selbsterregung: Überlegungen zum Painlevéschen Paradoxon
S.-H. Kim and M.Q. Feng	705	Fragility analysis of bridges under ground motion with spatial variation
P. Metallidis and S. Natsiavas	723	Linear and nonlinear dynamics of reciprocating engines
M. Abolghasemi and M.A. Jalali	739	Attractors of a rotating viscoelastic beam
Y. Zhang and W.D. Iwan	753	Some observations on two piecewise-linear dynamic systems with induced hysteretic damping
N. van de Wouw, A. de Kraker, D.H. van Campen and H. Nijmeijer	767	Non-linear dynamics of a stochastically excited beam system with impact
M.E. Erdoğan	781	On the flows produced by sudden application of a constant pressure gradient or by impulsive motion of a boundary
R.A. Vasin, F.U. Enikeev, M. Tokuda and R.V. Safiullin	799	Mathematical modelling of the superplastic forming of a long rectangular sheet

Number 6

M. Destrade	809	Surface waves in deformed Bell materials

L.M. Brock and M.T. Hanson	815	Two illustrations of rapid crack growth in a pre-stressed compressible neo-Hookean material
J.C. Ji and A.Y.T. Leung	829	Non-linear oscillations of a rotor-magnetic bearing system under superharmonic resonance conditions
X. Jiang and A.F. Vakakis	837	Dual mode vibration isolation based on non-linear mode localization
W. Lacarbonara, G. Rega and A.H. Nayfeh	851	Resonant non-linear normal modes. Part I: analytical treatment for structural one-dimensional systems
W. Lacarbonara and G. Rega	873	Resonant non-linear normal modes. Part II: activation/ orthogonality conditions for shallow structural systems
T.H. Young and C.S. Juan	889	Dynamic stability and response of fluttered beams subjected to random follower forces
P.C. Dumir, G.P. Dube and A. Mullick	903	Axisymmetric static and dynamic buckling of laminated thick truncated conical cap
B.P. Patel, M. Ganapathi, D.P. Makhecha and P. Shah	911	Large amplitude free flexural vibration of rings using finite element approach
J.J. Lee, I.-K. Oh, I. Lee and J.J. Rhiu	923	Non-linear static and dynamic instability of complete spherical shells using mixed finite element formulation
J. Kövecses and W.L. Cleghorn	935	Finite and impulsive motion of constrained mechanical systems via Jourdain's principle: discrete and hybrid parameter models
H. Pradeep and K.R. Rajagopal	957	Inhomogeneous deformations of a cone of a neo-Hookean solid

Number 7

A. Wineman and J.-H. Min	969	Time dependent scission and cross-linking in an elastomeric cylinder undergoing circular shear and heat conduction
C. Fetecau and Corina Fetecau	985	Decay of a potential vortex in a Maxwell fluid
C.W. Soh	991	Incompressible laminar 2D steady thermal boundary layers with temperature-dependent kinematic viscosity and thermal diffusivity
K. Vajravelu, K. Ramesh, S. Sreenadh and P.V. Arunachalam	999	Pulsatile flow between permeable beds
F.B. Freitas Rachid	1007	A thermodynamically consistent model for cavitating flows of compressible fluids
P.M. Jordan and P. Puri	1019	Stokes' first problem for a Rivlin–Ericksen fluid of second grade in a porous half-space

F. Labropulu	1027	D'Alembert motions for non-Newtonian second grade fluid
B.S. Wu, C.W. Lim and Y.F. Ma	1037	Analytical approximation to large-amplitude oscillation of a non-linear conservative system
M.E. Erdogan	1045	On unsteady motions of a second-order fluid over a plane wall
Y. Wan, D. Fang and K.-C. Hwang	1053	Non-linear constitutive relations for magnetostrictive materials
A. Di Egidio, A. Luongo and F. Vestroni	1067	A non-linear model for the dynamics of open cross-section thin-walled beams—Part I: formulation
A. Di Egidio, A. Luongo and F. Vestroni	1083	A non-linear model for the dynamics of open cross-section thin-walled beams—Part II: forced motion
S. Mandal	1095	Classical damped quartic anharmonic oscillator: a simple analytical approach
M. Ohsaki	1103	Imperfection sensitivity of optimal symmetric braced frames against buckling
C.A. Schenk and G.I. Schuëller	1119	Buckling analysis of cylindrical shells with random geometric imperfections

Number 8

W.Q. Zhu, Z.L. Huang and M.L. Deng	1133	First-passage failure and its feedback minimization of quasi-partially integrable Hamiltonian systems
A.V. Singh and Y. Elaghabash	1149	On the finite displacement analysis of quadrangular plates
X. Lignos, G. Ioannidis and A.N. Kounadis	1163	Non-linear buckling of simple models with tilted cusp catastrophe
S.-J. Liao	1173	An analytic approximate technique for free oscillations of positively damped systems with algebraically decaying amplitude
K.A. Coffey and P.A. Gremaud	1185	Numerical simulation of aerated powder consolidation
C.C. Nunes, H.L. Soriano and F.V. filho	1195	Geometric non-linear analysis of space frame with rotation greater than 90°, with Euler angles and quasi-fixed local axes system
T.I. Zohdi	1205	Large-scale statistical inverse computation of inelastic accretion in transient granular flows
E. Verron and G. Marckmann	1221	Inflation of elastomeric circular membranes using network constitutive equations

S. Ahmetolan and M. Teymur 1237 Non-linear modulation of SH waves in a two-layered plate and formation of surface SH waves

D. Ionescu 1251 Comparative analysis of the electrogravitational Kepler problem in GRT and RTG

G. Muscolino, G. Ricciardi and P. Cacciola 1269 Monte Carlo simulation in the stochastic analysis of non-linear systems under external stationary Poisson white noise input

Number 9

J.R. Walton 1285 Vibrations of neo-Hookean elastic wedge

D. Bernardini and F. Vestroni 1297 Non-isothermal oscillations of pseudoelastic devices

M.H. Toorani 1315 Dynamics of the geometrically non-linear analysis of anisotropic laminated cylindrical shells

M. Yuichiro and M. Haruki 1337 Bifurcation of water column oscillator behavior analyzed by two-dimensional graphical method

E. Bilgili, B. Bernstein and H. Arastoopour 1351 Effect of material non-homogeneity on the inhomogeneous shearing deformation of a Gent slab subjected to a temperature gradient

R.P. Agarwal and D. O'Regan 1369 Infinite interval problems arising in non-linear mechanics and non-Newtonian fluid flows

K.T. Joseph and P.L. Sachdev 1377 Exact solutions for some non-conservative hyperbolic systems

J.C. Ji 1387 Dynamics of a Jeffcott rotor-magnetic bearing system with time delays

O. Millet, A. Hamdouni and A. Cimetière 1403 An Eulerian approach of non-linear membrane shell theory

J.-J. Sinou, F. Thouverez and L. Jezequel 1421 Center manifold and multivariable approximants applied to non-linear stability analysis

L.P. Khoroshun and E.N. Shikula 1443 Influence of porosity on the non-linear deformation of granular materials

Number 10

G.M. Chechin, A.V. Gnezdilov and M.Yu. Zekhtser 1451 Existence and stability of bushes of vibrational modes for octahedral mechanical systems with Lennard–Jones potential

E. Baesu 1473 Finite deformations of elastic–plastic filamentary networks

S.A.Q. Siddiqui, M.F. Golnaraghi and G.R. Heppler	1481	Large free vibrations of a beam carrying a moving mass
X.B. Liu and K.M. Liew	1495	The Lyapunov exponent for a codimension two bifurcation system that is driven by a real noise
B.P. Madhusudan, V.R. Rajeev and B. Nageswara Rao	1513	Post-buckling of cantilever columns having variable cross-section under a combined load
J.M. Hill and N. Thamwattana	1523	Two approximate analytical solutions for the kinematically determined velocity equations for granular solids
T. Hayat, A.H. Kara and E. Momoniat	1533	Exact flow of a third-grade fluid on a porous wall
C. Fetecau and C. Fetecau	1539	The first problem of Stokes for an Oldroyd-B fluid
E. Momoniat	1545	Linear interactions affecting the propogation of waves in a linear elastic fluid
F.T. Akyildiz	1553	On the dispersion of a solute in Poiseuille flow of a third-grade fluid in a channel
P.G. Siddheshwar and C.V. Sri Krishna	1561	Linear and non-linear analyses of convection in a micropolar fluid occupying a porous medium
C.-S. Liu	1581	Two-dimensional bilinear oscillator: group-preserving scheme and steady-state motion under harmonic loading

Erratum

T.I. Zohdi	1603	Erratum to "Large-scale statistical inverse computation of inelastic accretion in transient granular flows" [Int. J. Non-Linear Mech. 38 (2003) 1205–1219]
S. Mandal	1605	Erratum to "Classical damped quartic anharmonic oscillator: a simple analytical approach" [Int. J. Non-Linear Mech. 38 (2003) 1095–1101]
